

I listen to Air One radio station at 100.9 FM on a daily basis. It is the only station I ever listen to in the car. It has come to my attention that a service called LPFM may be expanding and could possibly take priority over the Air One Broadcast I listen to. I am blessed every day to hear the positive messages and uplifting music played on Air One. People's lives are changed by the messages they hear on this radio station. Please don't do anything that would jeopardize this public radio station. I am a monthly supporter and think it is a vital service to the community. Thank You.
Sincerely, Susan A. Fuller
